Subject: Re: Parties of Record

Mark,

I oppose this project moving forward. It is sited in an environmentally sensitive area, prone to landslides. This project will further degrade the Bsche'tla creek's steep ravine behind it. Also, 155th Street is a steep, narrow road that will become more congested and dangerous with the addition of more parking and traffic resulting from this proposed build. Please register my opposition to this project moving forward.

Please advise next steps.

Thanks,
Vicki

Subject: Parties of Record

Good afternoon,

The Notice of Application for the Lakeview Place project review is being distributed. One method of notification is an email of notice to parties of record. I have talked with a couple of people thus far and am forwarding a copy of the Notice that will be in the Newspaper, mailed, posted on site, etc. As part of this initial Notice of Application, I will be compiling an ongoing list of commenters and interested persons to include in future notices for SEPA environmental review, notice of public hearing, notice of decision, etc.

Initially I thought I would start with the group included here and please feel free to share the Notice as may be needed. If anyone has any questions, either Dave Greetham or I can be available.

Much thanks
